WeTransfer Advertising

Working with us

Responsive advertising

Our ads respond to fit the most popular screens and ratios. Please note that the WeTransfer user interface is fixed in size and positioning across all desktop breakpoints.

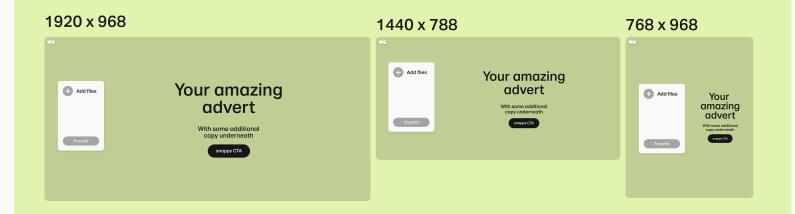

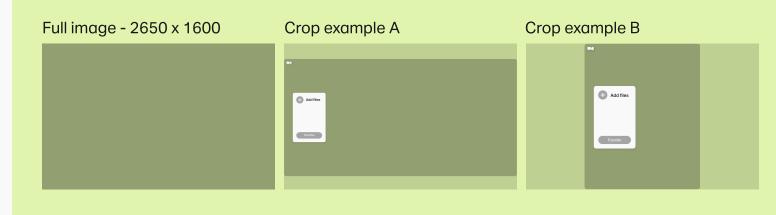

Image cropping

As a result of our responsive advertising space, background images will automatically crop depending on the screen ratio. This is why we ask you to supply images at a specific 8x5 landscape format.

Layered source files	 Layered Photoshop, Illustrator, Figma or similar accepted InDesign files not accepted 	Videos	 Minimum 1920x1080 Minimum frame rate of 24fps Ideally .mov or .mp4 format exported in H.264 or ProRes codec
